

The key to productivity:

High-Speed Document Scanner

ADMIS S 61

Features ADMIS S61

Camera	2 x CCD Camera front and back
Resolution	200, 300, 400 dpi
Image output	1 Bit Bitonal
Imaging function	ICE Board (Intelligent Contrast Enhancement) for dynamic threshold adjustment
Image format	TIFF G4
Interface	Smart SCSI TWAIN / ISIS (M 61)
Scanning speed	240 ppm A4 Landscape at 200 dpi 480 ipm A4 Landscape at 200 dpi Duplex
Document size	Minimum 50 x 70 mm Maximum 305 x 6.000 mm
Paper thickness	40 – 250 g/m ²
Paper feed	Batch Feeder for up to 500 sheets with ultrasonic double sheet detector
Options	Motorized height adjustable worktable Pre scan Imprinter (Inkjet) Post scan Endorser (Inkjet) Realtime Imprinter Control
Capture Software	DpuScan Professional
Dimensions	Height: 1140 - 1640 mm Width: 650 mm Depth: 1120 mm
Weight	85 kg

(Technical specifications may change without notice)

**ADMIS S 61 an S 41 are manufactured and distributed by
Microform under the trade mark of Agfa Gevaert N.V.**

For more information:

The ADMIS S 61 production scanner is the ideal system for demanding, high-volume scanning applications. Its performance strengths really come to the front where large volumes of source documents require fast and secure throughput. Even documents which normally prove extremely difficult to handle are no obstacles for ADMIS S 61. Outstanding productivity and efficiency are the major characteristics of performance which make the S 61 an essential component of leading document capturing solutions.

Productivity and efficiency are the key elements which determine the success of any document capture system. The high-volume scanner ADMIS S 61 has been specifically designed to offer maximum productivity combined with cost efficient performance.

Built to the highest standards of quality, durability and reliability the ADMIS S 61 is perfect for processing of structured and unstructured source documents. It includes a list of impressive features including: high speed cameras, an extremely reliable paper transport system and „open architecture“ interfaces.

The unique paper transport system works without susceptible belts and guarantees fast and secure transport and handling of varying paper documents at an ultimate scanning speed of up to 240 documents A4/min. In duplex mode up to 480 images A4/min can be processed. The scanning resolution can be selected from a choice of 200, 300 or 400 dpi.

Fully integrated into the scanning process, the ICE-Board (Intelligent Contrast Enhancement) supports dynamic threshold control, thus eliminating the need to sort or separate different document quality before scanning.

For ergonomic reason and to support also the operators performance ADMIS S 61 is equipped with a motorized height adjustable complete worktable and combined with a fully production oriented design and ergonomic user interface.

Low consumption of consumables and wear and tear parts as well as easy accessibility to all sectors of the paper transport system guarantees fast and simple cleaning, maintenance and a low level of running cost.
